## SUMMARY

Software Engineer , passionate about building world-class products through software development and engineering skills and I am actively seeking opportunities to leverage my skills and contribute to impactful projects.

## EXPERIENCE

### backend developer intern | VISANKA Technologies | Remote | January 2024 – February 2024

- As a backend developer intern I Developed RESTful APIs and performed tests using Postman Used MySQL and MongoDB databases.
- Conducted unit testing and applied test-driven development principles.
- Reduced system downtimes through efficient troubleshooting of server-side JavaScript codes, improving overall application performance for the company.

## PROJECTS

### To Do : Lists | [todolist-p1te.vercel.app/](#) | January 2024 – January 2024

- Built a task management website with a sleek design, including a dark mode.
- Implemented local storage for saving and retrieving tasks.
- Managed task deadlines with different color outlines to indicate urgency and handling priority.

### react gym website | [react-gym-website-blond.vercel.app/](#) | February 2024 –February 2024

- Designed an attractive, responsive website using Tailwind CSS.
- Developed an engaging homepage showcasing different gym plans, promotions, and features.
- Managed user plans, training splits, targeted muscle groups, and user goals.

### Crypto-tracker | [crypto-dashboard-avi.netlify.app/](#) | March 2024 – March 2024

- Retrieved real-time data from cryptocurrency exchanges and APIs for up-to-date prices, market capitalization, trading volume, and more Included a comparing system for side by side analysis.
- Allowed users to create a customizable watchlist for easy monitoring of favorite cryptocurrencies.
- Used Chart.js for interactive charts to visualize price trends and historical data.

### Restaurant website | April 2024 –May 2024

- Developed a responsive design frontend ordering website for a local restaurant using React.js.
- Developed a fully functional cart system for adding items, adjusting quantities, and proceeding to checkout.
- Built the backend using Node.js and Express, with MongoDB as the database.

## SKILLS

### Conceptual Knowledge:

- Problem-solving skills ,Object-oriented programming, test-driven development, debugging, algorithms, and data structures.
- Design patterns and SOLID principles.

### Technical Skills:

- **Front-end:** HTML5, CSS3, Tailwind, familiar with Bootstrap, JavaScript, TypeScript, React.js (State management using Redux & Zustand)
- **Back-end:** Node.js, Express, familiar with PHP
- **Other Tools:** SQL, MongoDB, Postman, Linux commands, Version Control (Git)

### Soft Skills:

- Creative thinking, communication skills,Self-motivation and decisiveness
- Project management skills & teamwork.
- Time management and ability to work under pressure.

## EDUCATION

B.Sc. in computer science | alexandria university | Minor in data science | 2025 | 3.47
